

Keeping the user in perspective, what care is to be taken while developing Login page of a website?

Enter Y / N after checking the content under description

Description	(Y/N)
Best practices	
Using consistent terminology (In registration page, if you use Login use Log out after logging in. Likewise Sign in / Sign out, Sign on / Sign off, Log in / Log out, Log on / Log off)	
Provide ready access to a login form	
Show logged-in status	
Providing username and password fields	
Differentiating the login component clearly	
Providing "Remember Me" functionality.	
Providing security (Provide SSL, Show log out status after certain period of inactivity)	
Reminding users of forgotten usernames and passwords	
Providing registration link	
Allow user to logout	
Providing a link to your site's privacy statement
